GitHub: [rachit8151 \(Rachit K. Patel\)](#)

Entry-level **.NET Core MVC Developer** with strong knowledge of **C#, ASP.NET Core, MVC architecture, and relational databases**. Experienced in building secure, scalable web applications with role-based access and CRUD operations. Seeking a junior developer role to contribute to backend-driven enterprise applications.

TECHNICAL SKILLS:

Frontend: C#, ASP.NET Core, .NET Core MVC, JavaScript(React, Next.js, Node.js), HTML, CSS (Tailwind, Bootstrap)

Backend: Python, Java, Oracle, MongoDB, SQL

Cloud Services / Tools: Git

Others: System Design, Web Services, Algorithms, Data Structures, AI/ML, Arduino, REST APIs

PROJECTS:

- **Campus Recruitment System:** Implemented a web-based campus recruitment system using MVC architecture to automate student registration, company postings, and application tracking. The system reduced manual coordination by 40% and improved workflow efficiency through secure role-based access for Admin and Student users.
- **Society Management System:** Built a society management web application featuring complaint handling, announcements, and maintenance tracking modules. Designed a relational database and implemented CRUD operations, improving record management accuracy by 35% and reducing issue resolution time between residents and administrators.
- **Entry Vision:** Developed an AI-powered smart campus entry system using full stack (JS) and Python with Media Pipe and OpenCV for real-time face detection and facial embedding. The system automated entry logging and access validation, reducing manual verification effort by **50%** and improving campus security. Designed to support scalable user enrolment and real-time monitoring for daily campus operations.
