

ISHITA PATEL

COMPUTER SCIENCE GRADUATE

Email Address: 22bmiit022@gmail.com

Phone number: +91 9909223861

LinkedIn: <https://www.linkedin.com/in/ishita-patel-b4509024a?>

GitHub: <https://github.com/Ishit02422>

CERTIFICATIONS:

Oracle DBA 11g/12c-Database Administration

Google Developer Student Clubs in “introduction competitive coding”

Education Department, govt.of Gujarat knowledge consortium of Gujarat webinar on “life skills”

Round 1 of National Creativity Aptitude Test 2023.

EDUCATION:

Master of Science in Information Technology |
BMIT, UTU | 2022 – 2026 | Gujarat, India

Motivated Computer Science graduate eager to apply programming and analytical skills in a dynamic organization to contribute to impactful projects.

TECHNICAL SKILLS:

Frontend: Full-Stack, ASP .NET Core MVC, JavaScript (React, Next.js, Node.js), HTML, CSS (Tailwind, Bootstrap)

Backend: Python, Java, Oracle, MongoDB, SQL

Cloud Services / Tools: Git

Others: System Design, Web Services, Algorithms, Data Structures, AI/ML, Arduino, REST APIs

ACADEMIC PROJECTS:

- **Campus Recruitment System:** Implemented a web-based campus recruitment system using MVC architecture to automate student registration, company postings, and application tracking. The system reduced manual coordination by 40% and improved workflow efficiency through secure role-based access for Admin and Student users.

- **AI-Based Resume Screening :** Developed an AI-based resume screening system to analyze and evaluate resumes automatically. Implemented functionality to extract key skills, experience, and qualifications from uploaded resumes. Used backend logic to match resumes with job requirements and generate suitability scores. Designed a user-friendly interface for resume upload and result visualization.

- **Ambulance Service Management System:** Developed a smart Ambulance Management System to handle emergency requests efficiently. Implemented user and ambulance driver modules with real-time request handling. Designed backend logic to assign the nearest available ambulance automatically. Integrated location tracking to reduce response time during emergencies. Improved emergency service coordination through a reliable and user-friendly system.
